ANTI-TERRORIST CELL

Two movies of the week - action thriller

When extreme danger threatens the innocent and defenseless, AT13 springs into action. An ultra-modern and covert Special Ops Counter-Insurgency squad, AT13 is the brave new team for a brave new world. Created and financed by an international consortium of governments and private interests, AT13 stands as the last line of defense against those who would attack the very foundations of civilization.

The men and women of AT13, assembled from special units throughout the commonwealth of nations, are the very best in their respective fields. The elusive Bremer, directing AT13 from a European location hidden even from the own team. Wolf, a brilliant and mercurial intelligence agent. Wade Cooper, a poet-warrior in the classic mode. Jack Darrow, a formally disgraced strategist trying to recover his honor. Giancarlo Valenti, the nimble explosives expert. And Kate, an Irish colleen with a lethal past. Officers and renegades who march to a different drumbeat of justice, one above and beyond the call of regular duty. All of them operating with a single mandate... to defuse any and all "clear and present dangers." By any means available.

MANHUNT

is set in the Jewel of South Africa, Cape Town. When one of the world's leading terrorists and Commander Darrow's old nemesis, VAN EYCK, is contracted by the "Cartel" to assassinate the German Chancellor during a high level meeting on international terrorism, Darrow and his team are sent in to prevent a blood bath.

CHECKMATE

A large amount of weapon graded plutonium has been stolen from a Russian Nuclear facility and traces of this deadly cargo are found in the sunken wreckage of a Finish ferry boat. Someone is trying to sell this Plutonium to the highest bidder and in a deadly race against time, AT 13 must prevent a nuclear holocaust on the streets of Vienna...
